

Sirs, In the continued attempt for quality, uninterupted radio, I selected XM satellite radio. I am concerned with the National Association of Broadcasters (NAB) attempts to influence the government to stop the satellite radio stations from either introducing or developing localized programming. I do not enjoy listening to 45 minutes of commercials on regular radio and would like to continue to support XM in any way I can. Please pay attention to consumers such as my self in this issue. Do not allow the NAB lobby to guide your decision making.
